**ART UNIT 2872**

Art Unit: 2872

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/09/2006 has been entered.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. The application has been amended as follows:

In claim 4, line 11, the language "the basis" has been changed to read --a basis--.

Claims 5, 7 and 8 have been canceled.

4. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest an outer mirror device for a vehicle comprising a mirror visor cover which covers a back surface of a mirror for rearward viewing to form a space between the mirror and the mirror visor cover, a mirror surface angle adjusting mechanism at which an electric motor, a rotating member rotating due to rotation of the electric motor, and a portion of a drive rod connected to the mirror and moving rectilinearly due to rotation of the rotating member, are accommodated in a first case, the mirror surface angle adjusting mechanism changing a mirror surface angle of the mirror by rectilinear movement of the drive rod; a control device having a second case which is connected to the first case within the space, and a control substrate which is accommodated within the second case and at which is

provided a control circuit power-supplying the electric motor on a basis of an operation signal; a mirror surface angle detecting sensor disposed within the second case, and detecting one of a position of the drive rod and a rotational position of the rotating member, wherein one of said first and second cases includes a wall disposed between said mirror surface angle adjustment mechanism and said control device that includes an opening for accommodating an electrical connector having detachably connectible electrical terminals such that said electrical terminals are interconnected when said first and second cases are positioned adjacent to one another, as recited in claim 4, lines 2-19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
